Figure 1. The effect of the concentration of the *Agrobacterium* strain on the transformation efficiency of *Agrobacterium* strain 101. The *Agrobacterium* strain 101 was cultured in the YEA medium for 24 h at 28 °C. The cell concentration was adjusted to 1.0 × 10⁸ cells/ml. The cell suspension was mixed with the cell suspension of the *Agrobacterium* strain 101 at the concentration of 1.0 × 10⁸ cells/ml. The mixture was then transformed into the *Agrobacterium* strain 101. The transformation efficiency was determined by the number of transformants per 10⁸ cells. The results are shown as the mean ± SD of three independent experiments.
